

# BrickEd and More Field Trip Sign Up

Fall 2022

## STEM Field Trips

BrickEd and More is excited to start sign-ups for Fall 2022! We welcome your school to sign up for an engaging experience for students centered around STEM education and the LEGO® brick. During our field trip experiences students will gain literacy skills in multiple content areas. Our field trips are also growth opportunities for students in social emotional learning, and much more!

### How does it work?

Our field trip experiences are designed to fit your individual needs as a teacher, grade level, and school. We develop a comprehensive plan for your grade level and/or school field trip that is based around standards that **YOU** submit. This model provides your students with a meaningful experience that is guaranteed to be valuable and by no means a waste of time!

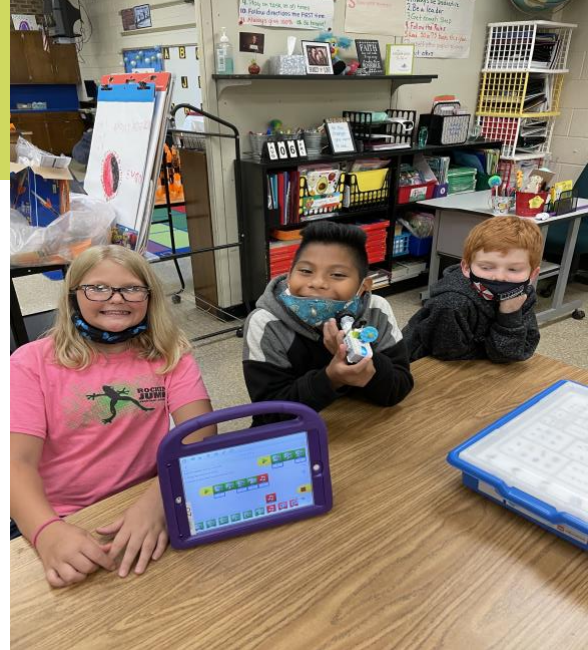

### Do we come to you, or you come to us?

We offer flexibility with our field trips. Whether you want to travel off campus, or not deal with the hassle of transportation, getting lunches, etc., we can provide you with the same field trip opportunity. Pricing does vary based on location of the field trip as we must factor in travel for our Engagement Specialists if we provide an on campus (at your school) field trip.

### How many classes can attend, and how long is it?

We ask that schools do their best to have 3 or 4 classes for a field trip. Our field trips range in time of 3.5-4 hours, plus time for lunch.

**“I loved it!! The students were excited and engaged throughout the day! I appreciate the opportunity and experience for my students. My gears are already turning and I’m anxious to plan more LEGO activities that align with the standards in my classroom! ♡”**  
~Davidson County Teacher

### Vision

The vision of BrickEd & More is to provide opportunities for schools, families, educational entities, and companies to experience the creativity of the brick in an educational way as they work to discover what it means to meld the art of play and learning in their respective places to accomplish specific goals.

### Mission

The mission of BrickEd & More is to inspire learning through creativity that engages the mind and enhances one's ability to problem solve using the plastic brick as a medium for hands-on manipulation. BrickEd & More seeks to ignite the mind one brick at a time, incite collaboration, and inspire creative thinking.
